Introduction

Industrial Partner mission is to improve our customer's production levels by providing them with high performance & long-lasting industrial machine knives & blades that maximise life of cutting machinery.

Our team of experts understands that every industry places unique demands on their cutting edges & we support our clients by offering them right product for their application.

All of our knives are made from the highest quality materials, machined and ground to precise tolerances and heat treated to exacting specifications. They are manufactured in modern facilities with some of the tightest process controls available in the world.

All knives are manufactured within the shortest lead-time in the industry!

AND DO EVEN MORE….

WHATEVER YOUR CUTTING NEEDS WE CAN PARTNER WITH YOU!

Messer für Papier
Couteaux pour le papier

KNIVES FOR **PAPER, PRINTING & PACKAGING**

INDUSTRIAL PARTNER offers a wide range of circular & flat knives used for paper mills starting from the pulping to the paper converting stage.
We offer knives for all common machine models used in the industry.
According to the application, we offer knives in different steel grades like

- Guillotine Knives
- Sheeter Knives
- Trimmer knives
- Binding & stitching knives
- Perforation Knives
- Folding Knives

TOOL STEEL
HSS
POWDERED
SINTERED
STEEL
TC TIPPED

- Top Slitter Knives
- Bottom Slitter Knives
- Dish Knives
- Score Cutters
- Multi block bottom knives
- Cross cutters
- Score Slitters
- Knife Holders

Messer für die Metallindustrie
Couteaux pour l'industrie du métal

KNIVES FOR **METAL** ENGINEERING INDUSTRY

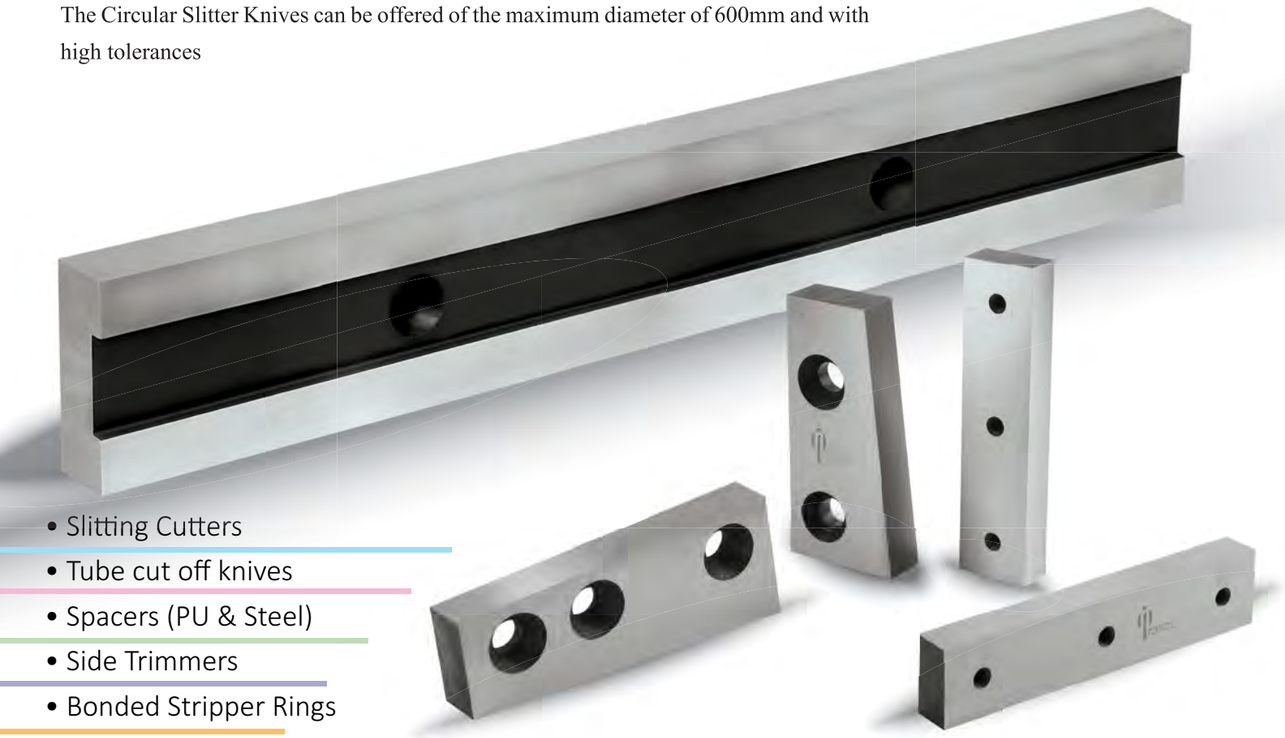
Industrial Partner offers a complete metal cutting solution for various metal processing industries like Steel Plants, Steel servicing/coil centers, metal fabrication companies, steel tower manufacturing, ship building & more. The company offers standard knives for common machineries as well as bespoke knives. As per cutting requirement, the company offers various steel grades like Alloy Tool steel, HCHC, High alloy shock resisting steel etc.

The correct toughness, edge retention & wear resistance of the metal cutting blades is achieved by using optimal raw materials and correct hardness as per applications.

We are capable of offering the Shear Blades of maximum length of 4000mm in single segment & having cutting capacity of up to 32mm thick material in cold condition.

The Circular Slitter Knives can be offered of the maximum diameter of 600mm and with high tolerances

- Guillotine Shear Blades
- Scrap Shear Blades
- Notching Blades
- Metal scrap Chopper knives



- Slitting Cutters
- Tube cut off knives
- Spacers (PU & Steel)
- Side Trimmers
- Bonded Stripper Rings
- Separator Discs

Messer für Recycling
Couteaux pour le Recyclage

KNIVES FOR **RECYCLING**

PLASTICS | RUBBER & TIRES | PAPER & CARDBOARD WEEE | WOOD |METAL

- Granulator Knives
- Rotor & Stator Knives
- Palletizer Knives
- Shredder Knives
- Chopper Knives
- Wear Parts

It doesn't matter if you granulate, shred or cut for recycling; Industrial Partner has the complete solution for your cutting needs! Whether it's straight, circular or complex shaped blade, we offer all kinds of industrial knives and blades for recycling industry.
The combination with the knowledge of recycling needs, precise machining to exacting tolerances and special heat treatment for obtaining high wear resistance and toughness ensure the first class knife for the recycling needs.
The commonly used steel grades for recycling blades are SKD11 / D2 / 1.2379, M2/ SKH51, A8, T1 or Vasco Wear
We offer bespoke and standard knives for common machines used in recycling industry like LINDNER, NGR, UNTHA, WEIMA, HERBOLD, VECOPLAN, ALPINE, ELDEN, PALLMANN and many more.
